

Damascus, 04/07/2026

To Whom It May Concern,

I am pleased to recommend **Ward Alshaheen**, who served as a dedicated volunteer in the **IT & AI Department** at Reparametrize Foundation from **July 2025 until now**, contributing a total of **208** volunteer hours. During this period, **Ward** was actively engaged in **Re-coding Post-Crisis Platform**, one of the Foundation's pioneering initiatives established in 2018 to advance urban recovery in post-crisis areas through AI-driven data, research, and sustainable solutions. Through this initiative, our mission is to transform affected cities into resilient, intelligent, and inclusive urban environments.

Ward Alshaheen joined us as a **Junior Researcher** during the **Brainstorming** phase into our current work, **Mosaic Recoding Syria**. He quickly proved himself in record time, leading to his promotion as a **Senior Leader**. During their time with us, **Ward** displayed outstanding commitment, professionalism, and skill, greatly benefitting our department and the overall mission of the Re-coding Post-Crisis Platform.

As a Senior Leader, **Ward** analyzed complex datasets, translated technical findings into actionable outputs, and ensured efficient execution across systems and workflows with precision and efficiency.

His contributions during the "Recovery Pathways" Event—which showcased the results of the Re-coding Summer School and marked the official announcement of the Reparametrize open-source database—were outstanding. **Ward** delivered a compelling public lecture on "The Role of Artificial Intelligence in Post-Conflict City Reconstruction Methodologies" and provided insightful contributions to the event's public debate, effectively bridging the gap between emerging technology and on-the-ground urban resilience.

Notably, **Ward** excelled in teamwork, frequently collaborating with and supporting peers, as well as demonstrating an admirable level of initiative. Their adaptability and problem-solving abilities proved essential in the dynamic environment of post-crisis work, and their positive influence helped elevate team morale and productivity.

Overall, **Ward Alshaheen** has been an asset to our Foundation, leaving a lasting impact through their dedication and expertise. I am confident they will bring the same level of commitment to any future endeavors. I highly recommend **Ward Alshaheen** and I am happy to provide further details if needed at our contact details below.

Sincerely,

Mhd Ziwar Al Nouri, M.Arch, PhD Candidate
Founder and Executive Director
Reparametrize Foundation

Re-coding Post-Crisis Platform — An initiative by Reparametrize Foundation, advancing urban resilience through data-driven, sustainable solutions for post-crisis recovery.

Reparametrize Foundation is a non-profit organization listed n°2246 in the Ministry of Social Affairs and Labor of the Government of Syria.
